

MAGELA BOBBY AKINOLA

AZURE CLOUD ENGINEER

Atlanta, GA | (470) 812-0497 | akinola04z1@gmail.com

linkedin.com/in/MagelaAkinola | github.com/Magela84 / magela84.github.io/magela-portfolio-website

SUMMARY

Azure Cloud Engineer with hands-on experience designing, deploying, and securing cloud infrastructure. Skilled in Infrastructure as Code (Terraform, Bicep, ARM), CI/CD automation, container orchestration on AKS, identity management with Entra ID, and FinOps cost optimization. Backed by nine years across enterprise IT support, Agile delivery, and cloud engineering — with a troubleshooting-first approach that root causes failures rather than patching symptoms.

KEY ACHIEVEMENTS

- Accelerated deployment efficiency by 40% by automating infrastructure with Terraform, ARM templates, and GitHub Actions CI/CD.
- Detected ~\$1,000/month in cloud waste in a demo environment by building an automated scanner for idle and orphaned Azure resources (unattached disks, unused IPs, low-CPU VMs).
- Improved application response times by 35% by optimizing full-stack workloads hosted on Azure.
- Architected and administered 40+ Azure resources across compute, storage, networking, and security.

SKILLS

Cloud & infrastructure (IaC): Microsoft Azure, Terraform, Bicep, ARM Templates, Azure Resource Manager

Containers & CI/CD: Kubernetes (AKS), Helm, Docker, Azure Container Registry, GitHub Actions

Security & Identity: Entra ID (Azure AD), RBAC, Managed Identities, Key Vault, Private Endpoints, Network Security Groups, Azure Policy

Operations & Cost: Azure Monitor, Log Analytics, KQL, backup & recovery, root cause analysis, FinOps, budget alerts,

Systems & Data: Linux (Ubuntu), Windows Server, Active Directory, Azure SQL, PostgreSQL

Leadership & Collaboration: Stakeholder communication, technical documentation (runbooks, RCA reports)

EXPERIENCE

Cloud Engineer

Apr 2024 – Present

Tek Tariq IT Solutions Limited

Remote

- Automated provisioning with Terraform, Bicep, and ARM; built and maintained GitHub Actions CI/CD pipelines.
- Provisioned hosting with Terraform (App Service + managed identity, zero secrets) and automated CI/CD with Docker + GitHub Actions.
- Implemented Entra ID identity and least-privilege RBAC across subscriptions.
- Configured monitoring, alerting, and backup/recovery; performed root cause analysis to eliminate repeat incidents.
- Optimized full-stack workloads (React, Java, Node.js, PostgreSQL) on Azure; administered Windows Server and Linux environments.

Scrum Master (Contract)

Aug 2021 – Mar 2024

Paysafe

Remote

- Facilitated Agile ceremonies for cross-functional teams of 8–12; contributed to a 20% increase in on-time task completion.
- Removed workflow bottlenecks, reducing delivery blockers by ~25%.

IT Help Desk Specialist

Jun 2017 – Jul 2021

Regency Hospice

United States

- Supported 150+ end users; resolved 20–30 tickets weekly across Windows, networking, and remote access.
- Managed Active Directory accounts, permissions, and access controls.

TECHNICAL PROJECTS

Azure Cloud Engineering — Hands-On Labs | github.com/Magela84/azure-cloud-engineering-hands-on-work

- Deployed containerized apps on AKS with Helm, health probes, and password less ACR pulls via managed identity.
- Built secret less CI/CD (GitHub Actions + OIDC) with Log Analytics/KQL monitoring and FinOps budgets.

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104) | Professional Scrum Master I (PSM I), Scrum.org — Oct 2022 | Certified SAFe® 5 Scrum Master, Scaled Agile — 2022 (expired 2023)

EDUCATION

B.S. Public Administration, A.M.E. Zion University

2013
